Work Experience

UX Developer

Learning Equality | June 2016 – Present

- Developing the front-end of Kolibri using Vue.js, ES6, and Webpack.
- Helping develop a living style guide for Kolibri.
- Working very closely with the UX design team for rapid iteration.
- Working on the Android build of Kolibri.
- Working on the pipeline of the Video Vectorization Project.
- Performing on-site user research in Guatemala and Mexico.

UX Design & Front End Development Intern

Learning Equality | September 2015 – June 2016

- Developed a web player for the rendering side of the Video Vectorization project.
- Implemented the player using JavaScript and the HTML5 canvas.

Wordpress Developer

The Center for Ethics in Science and Technology | September 2015 – June 2016

- Redesigning the center's site to improve user experience.
- Worked on improving the overall UX of the site for both admins and visitors.
- Ran a heuristic evaluation on the site.
- Interviewed the admins to gather their needs.
- Created wireframes and mockups for the new design of the site.
- Implemented the newly designed site using WordPress.

Web Designer

UCSD SPACES | August 2014 – July 2015

- Revamped the center's WordPress site to improve user experience.
- Made the site responsive, easier to navigate, and better organized.
